### Recommended maintenance:

Depending on the installation method, seams may remain visible and this should not be treated as an inherent flaw of carpet tiles. The subfloor must be dry, smooth, flat and free of dirt or any debris that could affect adhesion of tiles on the floor. Chair pads are recommended under office chairs with roller casters in order to protect appearance retention and to avoid premature wear. Carpet maintenance must be regularly be carried out to extend the life of the product. Regular use of vacuum-brushing cleaner is the best way to care for carpets.
